

The Laugh Chair®

Australian Case Example

The Laugh Chair® is perfect for medical waiting rooms, reception areas, conference and function rooms and even lobbies or foyers. It is available in upholstered and polypropylene seat options, as well as a range of colours and frames.

Richmond High School

Richmond High School is a state-of-the-art building designed by Hayball Architects. Corporate Chairs consulted with Hayball and 808 chairs were specified into this amazing project.

Our versatile Laugh Chair® was one of the key chairs used for the project as it was able to bring a sophisticated design to the work-spaces and meeting rooms in Richmond High.

"We trialled the Laugh Chair this year and were so impressed we have chosen to deploy the Laugh Chair as the main student chair across our two buildings. We have been impressed with the comfort, usability and modern design of the chair. It is a classroom chair for the future"

-Colin Simpson, Foundation Principal, Richmond High School
