

The Magic Chair

Australian Case Example

The Magic Chair creates individual comfort & occupational flexibility for many body shapes & sizes. It is a specified favourite among many government & corporate clients and is specified by many Ergonomists & Occupational Therapists across Australia.

Dohrmann Consulting specialises in nearly all matters regarding ergonomics, safety, human factors or engineering. So, when it comes to selecting office chairs for their workplace, it's important that the chair is able to promote good posture and is still comfortable enough for use the whole day.

“My Magic Chair has been the best chair I’ve had since working in an office. Very supportive, easy to adjust – and has lasted over 10 years! Wow.”

Ted Dohrmann

Managing Director of Dohrmann Consulting

“I love the adjustability of the seat (forward/rearward in relation to the back), so that I can get good support under my thighs”.

Bill Contoyannis

Forensic Engineer, Dohrmann Consulting
