

HOW TO USE THE EXECUTIVE LEATHER CHAIR

The Executive Office Chair is inspired by movement, pace, progress and achievement.

Designed for elegant boardrooms, meeting spaces or as a high-end executive chair.

Here is a quick guide on how to simple adjust your new Executive Leather Chair

THE EXECUTIVE LEATHER CHAIR

When seated, reach your hand down to feel the gas lift lever on the right side.

Lift this lever up to control the gas lift up and down to the required height.

On the left hand side, there is another lever for the synchronised tilting mechanism. Lift this lever up to allow the backrest to tilt.

The backrest can be locked into place by pushing the lever down. To unlock, lift the lever and lean back a little on the chair until you hear it click. The chair will then return to its upright position.

If you cannot recline the backrest, you may need to adjust the tension control by winding the handle on the right hand side

Backwards: decreases the tension
(recommended for smaller occupant)

Forward: increases the tension
(recommended for heavier occupant)
